21 February 1957

MEMORANDUM FOR: Project Director

SUBJECT: Justification for Penetration

1. The attached paper is a redoing of the basic paper, which is also attached for your information. It tries to take into account the requirements of actual briefing. It has been prepared with the advice of experts from OSI, OCI, and ORR. There has been no inter-agency coordination, and unless you feel it necessary, none is intended since it does not deviate in substance from the basic paper. The introduction is, I suppose, at best a basis for the dramatic exposition which you alluded to in our last conversation. The single pages on each target were prepared because of General Cabell's suggestion that we need to be specific and to be simple. I hope they will help.

25X1A

2. I have delivered two copies of this paper to [] and at a meeting with [] Wednesday evening, he, [] gave instructions to Frank to develop graphic materials which would reveal the relation of these targets to weather openings and numbers of missions.

25X1A

25X1A

3. Pending additional guidance as to what I can do that would be useful, I hereby rest the case.

[]
JAMES Q. REBER

Intelligence Requirements Officer
